

“ Getting somewhere – anywhere – feeling relaxed and refreshed and ready to go. That’s what I love about chartering a private aircraft. ”

Welcome to The Charter Company

We understand that there's no such thing as an ordinary flight. Every trip is unique. Every client has different needs. Every route requires careful planning.

Our multilingual London-based team has years of experience in private aviation and logistics. So whether it's a last-minute weekend away or a complex multi-stop business trip, you can be sure that every part of your flight will be taken care of – right down to the finest details.

At The Charter Company we're proud of our aviation heritage. We're a wholly owned subsidiary of Twinjet Aviation, founded in 1982, and a well-known name in the aviation industry. So as a company we have a strong operational background – unusual for most charter brokers.

This means, as our client, you can choose from thousands of aircraft worldwide, and have unrivalled access to operators and airports globally. And with an office in the Middle East; a partner in the US; and a 24/7 operation in London, you can fly anywhere in the world, every minute of the day.

Welcome onboard.

Charter Sales Director
The Charter Company

What do we do at The Charter Company?

We organise private jets and helicopters so busy people can go on vacation and time-strapped executives can get to important meetings.

We arrange executive airliners for politicians and royal family members to attend worldwide events. We organise commercial aircraft so groups of people can go to roadshows, product launches and sporting occasions. And we can even arrange yacht charters for business or pleasure.

But we like to think we go a bit further than that.

Our job is to help you make the most of your time. To get you the best deal we can. To help you plan your itinerary. To come up with solutions to problems. To suggest ideas you hadn't thought of. To make your trip memorable. To make it happen.

In short, when it comes to your travel arrangements, our job is to give you one less thing to worry about.

MORE TIME FOR LIVING

“Hi, the meeting in Paris finished early.
So, I’m boarding the jet now.”

Tick Tock. Tick Tock. Time is the most precious commodity you have. Once it’s gone, it’s gone; so it’s essential you make the most of every moment.

Private air travel saves you time: No delays. No queues. No inconvenient airport locations. And no hanging around in faceless terminals checking your watch.

You choose the time you want to fly. Where in the world you want to go. And when you want to come back. You fly to your own timetable. Not an airline’s. So, if you want to make a change to your schedule - you can. Just give us a call anytime, day or night, and we’ll make the arrangements for you.

Whether you’re flying for business or for pleasure, make every second count.

Time. Don’t waste it.

MORE SPACE TO BREATHE

“How was the flight? Amazing. I stretched out and slept the whole way.”

The world's a busy place. It's hectic, it's crowded and it's chaotic. But it doesn't have to be that way when you travel.

Imagine a sanctuary in the sky. A space where luxury, tranquillity and opulence come as standard. A space to relax. Wind down. Make decisions. Prepare. Stretch out. Switch off.

Private air travel feels like the finest hotel you've stayed in; the most sumptuous meal you've enjoyed; and the best service you've received: only better.

And from the moment you arrive at the airport's VIP terminal to the moment you disembark the aircraft, the crew and staff are on hand to ensure you have everything you need.

Space for business. Space to relax. Space to do what you want.

Space. Make the most of it.

“We clinched the deal and signed the contract at 39,000 feet.”

YOUR SAFETY COMES FIRST

Nothing is more important than feeling safe and secure. Especially when you fly.

Which is why all the aircraft we use meet stringent international safety standards.

Our European operators adhere to European Aviation Safety Agency (EASA) standards. These regulations cover every aspect of aviation including aircraft safety checks; aircraft maintenance; insurance; and ongoing crew training. Where EASA standards are not applicable we ensure that operators have an AOC (Air Operator Certificate) issued by their local Civil Aviation Authority. This ensures that wherever we fly in the world, we always have the same high standards of safety and security.

You'll always receive absolute discretion from the onboard crew. And, where appropriate, we'll liaise closely with security services, embassies and foreign offices.

Rest assured, we're serious about your safety and security.

Safety first. And last.
